

V¹² Shoot

GROUP 2 FERTILISER

Reg. Number B4510 Act 36 of 1947

V¹² Shoot is a unique blend of specific minerals, amino acids, vitamins and natural plant growth stimulants (e.g. kelp and Triacantanol) to be used in the vegetative growth phase of crops.

Application:

Method: Foliar spray or drip irrigation.

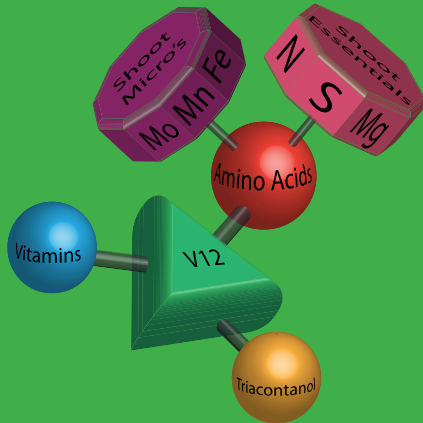

Rate:

- Row crops (maize, wheat etc.) – 500 ml/ha applied at 3-4 leaf stage and repeated 28 days later.
- Veg & small fruit – 500 ml/ha applied 2 weeks after emergence/transplant and repeated 28 days later.
- Orchards & vines – 500 ml/ha applied every 28 days during vegetative growth phase.

Precautions:

When mixing with other fertilisers always jar test for compatibility.
Mix well before dispensing into application tank.

Nutrition for the vegetative growth phase

Typical Analysis

N	10.00 g/kg
Mg	10.78 g/kg
S	31.94 g/kg
Fe	24 000 mg/kg
Mn	5742 mg / kg
Mo	4520 mg/kg
pH	4.7
SG	1.2
